

PWEA For Smaller Classes.

We all care deeply about the students of Prince William County and we want to do everything we can to help them succeed. But right now, insufficient funding and the highest class sizes in Virginia are limiting our students' educational opportunities. This IS a problem that we can solve if we work together throughout our community to insist upon meaningful solutions.

In order to help decision makers and members of the public better understand the problem and the need for collaborative solutions, PWEA is collecting individual examples of the real impact of large classes on students, school staff, and the community as a whole. Please share your story of how large class sizes and school overcrowding are impacting the students you care about....
